THE IMPACT OF TECHNOLOGY ON HUMANITY: DID GOD CREATE THE INTERNET?

A recent study shows the average age a child first sees porn is eight years old. Pause for a beat and consider the impact of that statement, and know that there are many more startling facts that surround the way technology is integrating into every aspect of our personal and professional lives.

Among the millions of utopian joys gained from the internet we also find ourselves enduring much that is dystopian. The concepts discussed in Scott's most recent book, *Did God Create the Internet? The Impact of Technology on Humanity*, are the backbone of this thought-leading keynote. One of the most speculated questions people (especially parents) have about technology is how it will impact us as a species over time. Will all these digital tools be good or bad for us as a species? What is technology doing to us? Are we going to be happier? Work longer and harder, or less? Will we have less privacy? Will younger generations lose capabilities that older generations had, or will our young people be more powerful than their predecessors?

Scott weaves technology together with philosophy into a thought provoking talk that is sure to be mind-expanding. There is a lot of flexibility to deliver content that is futuristic or relevant today. The

tone can be conversational and filled with stories, or a serious call to action to make better decisions about boundaries with digital tools.

(Despite the title of Scott's book, this talk is not religious in nature.)

LEARNING OBJECTIVES

- Consider the impacts technology is having on our physical and psychological well-being
- Develop insight into coming trends, such as machine learning, artificial intelligence, and the singularity, which will disrupt every characteristic of what it means to be human
- Analyze why all visions of the future are dystopian; why don't we see a utopian future?
- Learn how the HUMALOGY® balance can act as a guide to integrate technology in ways that are healthy for humanity
- Ensure the digital transformation will be positive for everyone

BEST AUDIENCE

Everyone: this talk is meant to be a thought-leading exercise for anyone interested in how technology is and will continue to impact humanity
