Cybersecurity Awareness

Cybersecurity: The Battle in Cyberspace We Must Win

The Internet of Things, Cyber Warfare, Digital Pearl Harbor: The field of cybersecurity will only grow in its impact on people, organizations, and our world. What will the future bring?

In this presentation, Scott looks forward to tackling some of the challenges we will soon face in cyberspace. Will we witness a rise of surveillance on each of us, constant threats of digital attacks from state-sponsored actors, and bad guys attempting to seize control of our vehicles, our wearable devices, and our smart homes? These are some of the important topics that will be addressed in this presentation.

Scott is recognized for his unique future vision and his ability to extrapolate technology trends that will influence our world.

In this program, he points this capability toward the world of cybersecurity to explain why it will become one of the most critical elements of our future.

LEARNING OBJECTIVES

- ✓ Analyze the ways new technologies will impact the field of cybersecurity
- ✓ Evaluate how the Internet of Things remains an enormous threat to our infrastructure
- ✓ Identify the increasing danger from organized cybercrime
- ✓ Understand what each of our growing digital footprints will mean for our privacy
- ✓ Learn steps you can take to protect your devices, and yourself, in an increasingly connected world

BEST AUDIENCE

Business-side leaders looking to learn the fundamentals of cybersecurity, technology-side leaders looking further into the future of cybersecurity; it can also be engaging for people of any level of their careers.
