SCOTT KLOSOSKY

Throughout his career, Scott Klososky has been on the forefront of technology and industry. He is renowned globally for his ability to recognize and capitalize on future trends regarding the ways technology is shaping business and our world. He is currently invested in guiding leaders through the digital transformation.

Scott is the founder and principle of technology consulting firm [Future Point of View](). Scott regularly advises C-suite executives inside some of the nation's most recognizable organizations. Through Future Point of View, he works with organizations of different sizes and industries to assess and improve their digital maturity.

Scott has developed the innovative concept of HUMALOGY®, the blending of technology and humanity. Humalogy provides a framework on how leaders can best balance technology and human effort to make processes more efficient and effective.

A widely sought after speaker, Scott speaks to audiences around the world on a range of topics including cybersecurity, leadership, data intelligence, trendspotting, digital marketing, and finding the Humalogy balance. He has developed a reputation for delivering informative, thought-provoking, and entertaining presentations.

For much of his career, Scott has been devoted to helping organizations protect their digital assets and pilot what is becoming an increasingly critical area for the health and survival of all: cybersecurity. He is an owner in TriCorps Security which provides a host of cybersecurity services including internal and external assessments, vulnerability testing, forensics, remediation, and team member training. He has spoken in front of the FBI's Cyber Warfare Conference and the Federal Government for Financial Accountants. He is driven to ensure that all organizations can effectively protect themselves from cyberattack.

Additional Noteworthy Accomplishments
- ✓ Scott's journey to becoming a leading voice in the field of technology began fresh out of high school, where his job as a delivery boy was a springboard into the world of technology. He became division head of a computer sales division and then purchased it as his own company. It was eventually built into a twelve-store operation in three states.

- ✓ Scott was a founder and CEO of webcasts.com, an early producer of webcasted media ranging from corporate and government communications to sporting events and entertainment. He sold webcasts.com in 1999 for $115 million. His expertise in leadership and his creative approach to business direction inspired Critical Technologies to hire him as a turnaround CEO, where he completely rebuilt the underlying products and brought the company to profitability.

- ✓ His was the founder and CEO of Paragraph, Inc., a Soviet/American joint venture founded in 1988, despite international tensions. Half of the company was sold to Silicon Graphics, and the other half is still expanding today (Parascript, Inc.).

- ✓ Scott also collaborated with H.R. Haldeman to publish a diary of his years as an aide to President Nixon, which became a bestseller (Putnam Publishing), and involved Sony Interactive in the release of a book companion CD-ROM.

The author of four books, Scott's most recent title *Did God Create the Internet? The Impact of Technology on Humanity* provides an in depth look at how technology is changing humanity and what how this evolutionary impact will mean for our future.
